Stand out from the crowd

01 Sometimes it doesn't take long for a strong character to reveal itself. In the new T-Roc all it takes is one glance. The progressive design language is visible in the strong, striking and sporty stance of the SUV. Take for example its wide front grille with integrated LED headlamps and separate unique signature LED daytime running lights which create an unmistakable look, especially at night. The elongated coupé silhouette is characterised by a striking chrome strip running the length of the side roofline which emphasizes the SUV's bold design. Stand out from the crowd with two-tone finish with black colour for the roof, A-pillar and door mirror housings. It's truly an SUV that complements the style and confidence of the driver. The only question is, are you ready to Roc?

Strong impression and expression

02

02 The T-Roc is designed to be noticed. Its sporty, modern exterior heralds a new era of Volkswagen style, combining the practicality of an SUV with the agility of a sports model. The rear diffuser complements the distinctive style of the T-Roc design, giving a robust, athletic look, while chrome effect trapezoid exhaust tailpipe fascia emphasise its urban character. The sporty body-coloured bumper with silver-metallic highlight adds a touch of elegance and the dynamic design of the wide and distinctive tail lamps enhance the sporty design and gives the SUV a strong road presence.

03

03 Eye-catching R17 inch 'Mayfield' Diamond Cut alloy wheels give the T-Roc design a distinctive look

Self-confidence comes from within

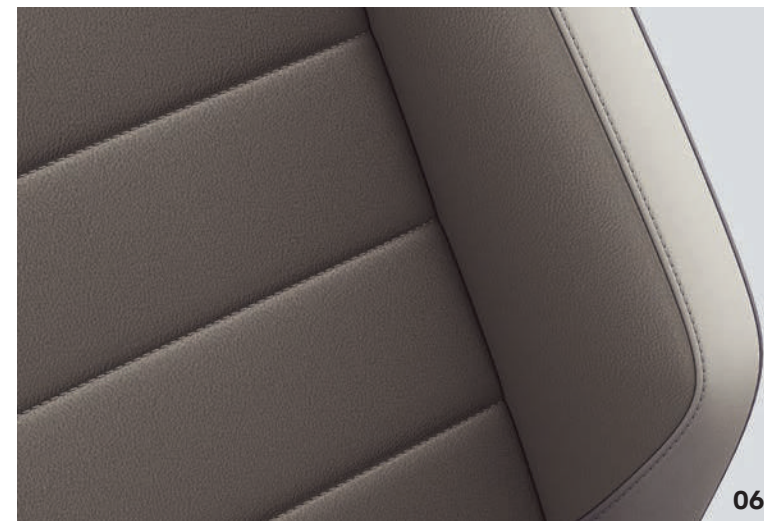

Robust, modern and elegant, the interior of the T-Roc embraces the future, combining an all-new design with Volkswagen's characteristic build quality. Unprecedented levels of functionality and technology, enhanced by ergonomic attention to detail, place it in a league of its own. Its large 445 litre boot allows you to carry your world with you, wherever you go. With plenty of space and intuitive features, the T-Roc offers all you could ask for in terms of comfort, style and convenience. Look within and discover the inside story.

All-new interactive dashboard

04 Enjoy all the benefits of an interactive, digital dashboard thanks to a host of features. With the Active Info Display acting like a Digital Cockpit, get an even more personal driving experience geared solely to your needs. Answer calls with ease or play your favourite tunes from your smartphone thanks to the Composition Media touchscreen infotainment system with App-Connect. With the T-Roc, you will not just arrive at your destination without any stress but also feeling entertained.

04

05 With its bold exterior, the new T-Roc automatically turns heads – and can also get your passengers looking to the skies upon request. At the touch of a button, the retractable panoramic sunroof opens up a brand new perspective.

06 Once you get behind the steering wheel in the new T-Roc, one thing quickly becomes clear: its powerful appearance is more than justified. Take notice of the 'Vienna' leather seats, the highest quality material combine with ergonomic styling and lumbar support to bring you seats that are both comfortable and luxurious.

07 The new T-Roc combines the desire for something unusual with the level of comfort you are used to. The 2-zone Climatronic air-conditioning system allows you to have two individual temperature settings within the SUV whilst travelling. You'll come to appreciate it in the hot summer heat of the city and in the dappled sunshine of the country.

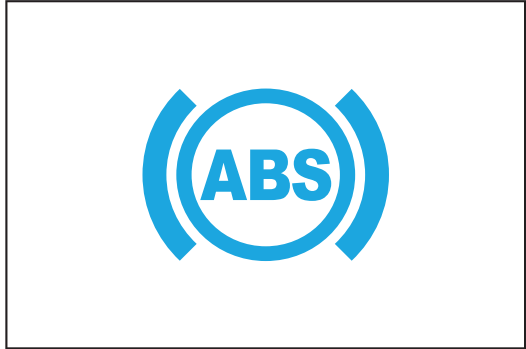

Power to be you

The state-of-the-art 1.5L TSI EVO engine with ACT, gives you a superior driving experience, never compromising between power and efficiency. Enjoy a powerful drive every time, because the efficient turbocharged engine delivers 150 PS power and 250 Nm torque. With the paddle shift gears, make the most of the smooth shifting 7-speed Automatic DSG Transmission.

The T-Roc comes equipped with intelligent – Active Cylinder Technology or ACT that senses the driving pattern and accordingly activates or deactivates 2 cylinders out of 4 resulting in reduced fuel consumption. The switch between 2 to 4 cylinders and vice versa happens super-fast, faster than a blink of the eye.

Suave yet safe

Confidence comes as standard in the new T-Roc. Whether you're in a traffic jam or city traffic, in the new T-Roc, you are equipped for almost any situation – even when you stray from the beaten path.

Intuition. One you'll feel in the Electronic Stability Control, a technology that improves the vehicle's stability by detecting and reducing any loss of traction.

The advanced Anti-lock Braking System stops the wheels from locking up, avoiding any unexpected skid. The six airbags ensure protection for everyone inside, while the tyre pressure monitoring system helps you avoid unsafe driving conditions. The reverse parking camera and park distance control help you back out of or drive into a parking spot with ease. And KESSY - the keyless entry and starting system offers you convenient and secure access to your car.
